

Advanced Security for your home and family

COOPER Safety

i-on160EX residential security system

Radio expansion avoids damage to decoration during installation

Advanced communications options ensure you get the response you need from a call/text to full police response

Elegant and discreet keypad design to fit with any décor

Customise the protection of your property with a wide range of setting options

Suitable for large properties: expandable to 160 detection zones

A range of detection devices to suit all requirements including panic buttons.

The products and accessories your lifestyle demands

The i-on160EX has been designed with the large residential user in mind, the system can be divided into different areas to support the arming of outbuildings or the main property exterior while you are at home.

The radio expansion means that your installer can fit the system with no impact on your décor and a range of radio panic alarm buttons provide additional security for residents. The system can be set from a range of different accessories; prox tag, remote control or pincode.

Wired Keypad

		Description
Detectors	PIR	Installed wirelessly in the corner of a room to detect movement
	Pet Tolerant PIR	Installed wirelessly in the corner of a room to detect movement, ignoring pets up to 25kg
	Door Contact	Alerts the alarm panel when the door is opened. Available in white or brown
	Smoke Detector	Wirelessly linked to the alarm panel. Optical smoke detection
	Shock Sensor	Senses vibration from someone entering by force. Fitted to a door or window. Ideal for conservatories or large windows. Available in white or brown
	Glass Break Detector	Detects the sound of breaking glass
	PA Button	Can be a pendant or belt clip. This goes into alarm when the two buttons are pressed together, ideal for elderly or vulnerable residents
Controls	Wired Keypad	Stylish and easy to use keypad with simple menus
	Wireless Keypad	Fit a second keypad by the back door or on the landing for setting and unsetting
	Remote Control	Set and unset the system quickly and easily from inside or outside the property
	4 Relay Board	Enables you to add additional bells and sounders for notification
Alerts	External Sounder	Local audible and visual warning devise
	Dummy Sounder	Effective deterrent for the back of your property
	Plug-in SD/comms modules	Dials out to the phone numbers you have specified or to a manned guarding station
	ADSL Filter	If you are using the comms module with broadband, this is essential for your phone line
